Key services for Publishers

All services are accessible through Publishers Portal (since 2017, new portal on 2025)

Publisher can:

- Manage Publisher's data and profile
- Request ISBN, ISMN, ISSN standard number
- Download EAN barcode in vector graphics
- Upload output-ready files and e-books for archiving
- Manage publications' legal rights and access restrictions
- Follow lending statistics of publications
- Retrieve original files from the digital archive
- Files are safely stored in the digital archive DIGAR

Availability and access rights

Changes of the digital archive solutions:

- access - unite three access environments to one single portal DIGAR.
- long term preservation - new service (Exlibris, Rosetta)

Principles:

- The publisher decides about access rights
- The e-legal deposit copy, preprint files may be used at an authorized workplace.
- Web Access and copying to external media is disabled
- Authorized workplaces are located in 5 legal deposit libraries.

Where are we now?

- Cooperation with publishers is successful, strong collaboration means that there has been no need to apply fines to get legal deposit copies.
- **Developing new services:**
- **MIRKO – e-lending platform for all Estonian people**
- Additional service: if licence of e-book or audiobook are ended, there will be link to publishers pages, people could buy a book
- Under discussion – with publishers, possibility to use MIRKO service and e-legal copy of book, to built new service.
- Paid commercial service and free library service will work together.
- People will always have access to books!
- **Estonian audiobooks – cooperation between publishers and National Library**
- National Library offers from 2023 services as Library for the Blind and Print Disabled
- Publishers could use audiofiles produced by us to prepare new audiobooks
- National Library as phonogram producer will have additional budget to buy e-books

Challenges!

- Publishers creating AI-generated books in Estonia (12%). AI books can be given ISBNs? What about National Bibliography?
 - **2023:** 7500 printed titles (3863 books, 12% AI generated?) and 7303 files (not inc ephemera and 1/5 material which we digitize from legal deposit print copies)
- One title and different formats: online pdf, preprint pdf, epub, mp3 etc. Is it still valid?
- Estonian e-residents: proposal to abandon these publications as national publications.
- Accessibility – data and text mining. Library is going to develop authorized workstations and add digital humanities tools.
- How to collect Estonian video games?

Thank you!
